Education

Monash University – Bachelor of Computer Science — Jul 2023 – Jul 2026
Specialisation: Algorithms and Software

Monash College – Diploma of Information Technology — Oct 2022 – Nov 2023
Computer Science Stream

Experience

Software Engineer (Volunteer) at PT. Kelapa Asia Abadi — *Sep 2026 – Present*

- Designed and engineered a QR code-based web app, allowing business owners to monitor security guard activities, schedule rotations, and log schedules.
- Designed the platform to be accessible on phones and desktop; Implemented multilingual support using i18n internationalisation for Indonesian and English.
- Developed the app using TypeScript; Preact for lightweight build for older phones; PostgreSQL for database; REST API for backend; Git for Version Control; GitHub Actions for CI/CD pipelines; Docker for local development; Playwright for testing; Claude Code for AI-assisted development.

Projects

Mogo – Android Rideshare Application (Final Year Capstone Project) — *Dec 2025 – Jun 2026*

- Developed an Android rideshare application for Monash University students and staff, using Kotlin, Jetpack Compose, Supabase and Android Studio.
- Integrated Google Maps Platform APIs to support location search, interactive maps, and route calculations.
- Collaborated within a 4-person Agile Scrum team, using Jira for sprint planning, progress tracking, and task coordination.
